【Hazard Perception Video Questions】 Total: 10 Questions Answers in Purple			
No.	Answer	Question	Video No.
01	(1)	An oncoming vehicle continues to display its turn signal and approaches the intersection without slowing down. What should you do? (1) Slow down first and proceed only after confirming it is safe. (2) Honk or flash your lights to remind the vehicle to let you pass first. (3) Vehicles going straight have priority; assume the other vehicle will yield to me.	202601
02	(3)	When passing through an unsignalized intersection, you notice a motorcycle approaching from the side without slowing down. What should you do? (1) Speed up to pass and avoid conflict with the other vehicle. (2) Vehicles going straight have priority; assume the other party will yield to me. (3) Slow down and prepare to stop.	202602
03	(2)	You notice a vehicle approaching from behind and displaying its turn signal in your rearview mirror. What should you do? (1) Speed up and drive away to avoid conflict with the other vehicle. (2) Release the accelerator and slow down to respond. (3) The other vehicle may not affect me, so there is no need to pay attention.	202603
04	(1)	When starting on a green light, you notice a vehicle from the cross direction showing no sign of slowing down and rapidly approaching the intersection. What should you do? (1) Delay starting and brake to a stop; proceed only after confirming the cross-traffic vehicle has stopped or passed. (2) Assume the other vehicle will stop at the intersection, and start at normal speed. (3) Since the light is green for me, start immediately and honk to remind the other vehicle to stop.	202604
05	(2)	Please identify the blind spot in the video from which a vehicle may emerge. (1) The pillar on the sidewalk. (2) Behind the oncoming vehicle. (3) Parked vehicles on the roadside.	202605
06	(1)	When turning right, there are pedestrians crossing on the pedestrian crosswalk at the intersection. What should you do? (1) Slow down and stop temporarily to let the pedestrians pass first. (2) Maintain speed and pass before the pedestrians enter your driving path. (3) Honk to remind the pedestrians that your vehicle goes first.	202606
07	(3)	A pedestrian on the roadside may cross the road. What should you do? (1) Honk or flash your lights to warn the pedestrian. (2) Maintain speed and swerve around them directly. (3) Slow down in advance and let the pedestrian cross first.	202607
08	(1)	While driving on a freeway, the vehicle ahead to your right changes lanes to the left. What should you do? (1) First judge whether the safe distance is sufficient and slow down in advance. (2) No need to pay attention; the other driver will judge the safe distance from your vehicle on their own. (3) Honk or continuously flash your lights to remind the other driver that you go first.	202608
09	(3)	When preparing to pull away from the roadside, what should you do? (1) Use the rearview mirror to confirm there are no vehicles approaching from behind. (2) Activate the turn signal. (3) All of the above.	202609
10	(3)	When preparing to make a left turn from the roadside, what should you do? (1) Activate the turn signal. (2) Confirm there are no pedestrians on the pedestrian crosswalk. (3) All of the above.	202610
